

Taking a look at UCCS Wireless Stats from 2024

Wireless Data Peak

566

Terabytes of data

April saw the highest traffic of any month in 2024, with 566TB of wireless data.

566TB is equivalent to:

- 23,183 Blu-ray discs
- 22.1 years of Netflix streaming
- 8.5 million TikTok videos
- 452 years of Spotify streaming
- 296.7 million Snapchat snaps
- 3.04 billion Reddit posts

18,569

The University Center was the most popular building on campus, with over 18,500 unique devices connected per month.

Apple products, such as iPhones, MacBooks, and iPads, make up about half of the wireless devices on campus.

48%

Campus Connectivity

7,388

January 23 was the busiest day on campus, with nearly 7,400 devices connected at one time.

1,006

Columbine Hall was the busiest building on campus, with over 1,000 devices connected at the same time.
