Report Notes
> Device counts are measured every hour, every day, for each of the three SSIDs.
> The MIN Device count for a particular day is the lowest recorded count based on all of the hourly measurements taken that day.
> The MAX Device count for a particular day is the highest recorded count based on all of the hourly measurements taken that day.
> The AVG Device count for a particular day averages all recorded hourly counts. The "all-day" average averages all hourly measurements, while the "8a-6p" average only averages the counts taken during that specific time frame.
